

Figure 1 Relation of PF-GIC, FHC, RIC, and PF-FVAC

An arrowhead points to the larger of the two quantities being compared. For example, the diagonal arrow indicates that $\mathbf{D} < R^{1/\rho}\Gamma^{1-1/\rho}$, which is one way of writing the PF-FVAC, equation (??)

Figure 2 Convergence of the Consumption Rules

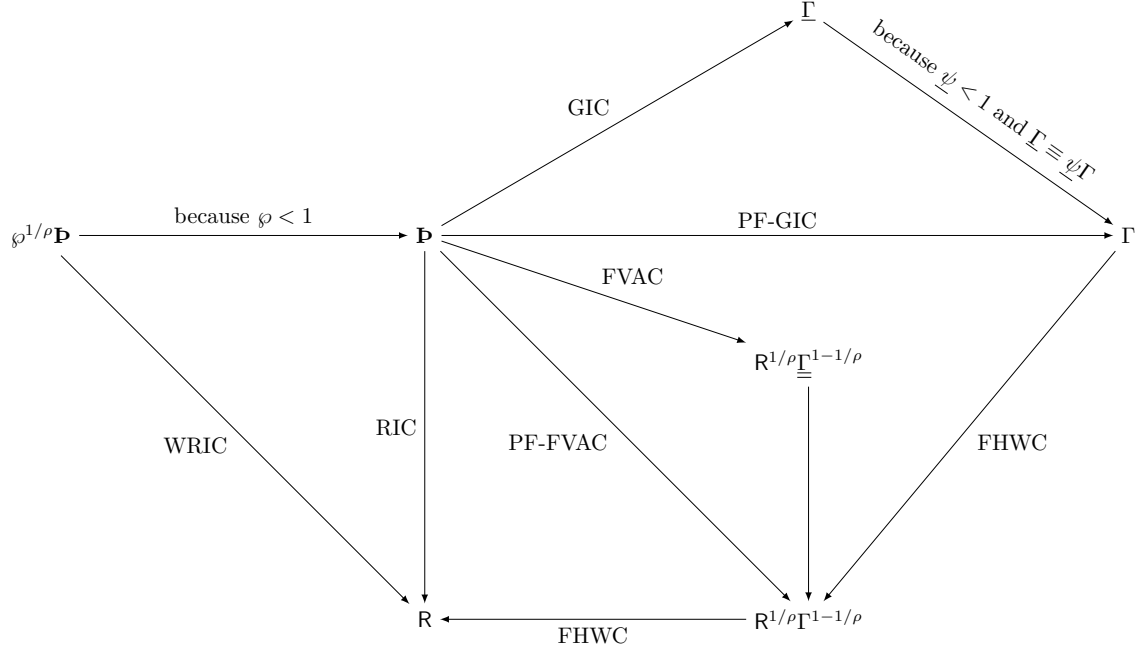

Figure 3 Relation of All Inequality Conditions
See Table ?? for Numerical Values of Nodes Under Baseline Parameters

Figure 4 Example Solution when FVAC Holds but GIC Does Not

Figure 5 Target m , Expected Consumption Growth, and Permanent Income Growth

Figure 6 Limiting MPC's

(a) Bounds

(b) Target m
