

Figure 1 Relation of PF-GIC, FHC, RIC, and PF-FVAC

Arrows reflect the direction of the relationship; an arrowhead points to the larger of the two quantities being compared. For example, the topmost arrow, pointing from \mathbf{D} to Γ indicates that $\Gamma > \mathbf{D}$.

Figure 2 Convergence of the Consumption Rules

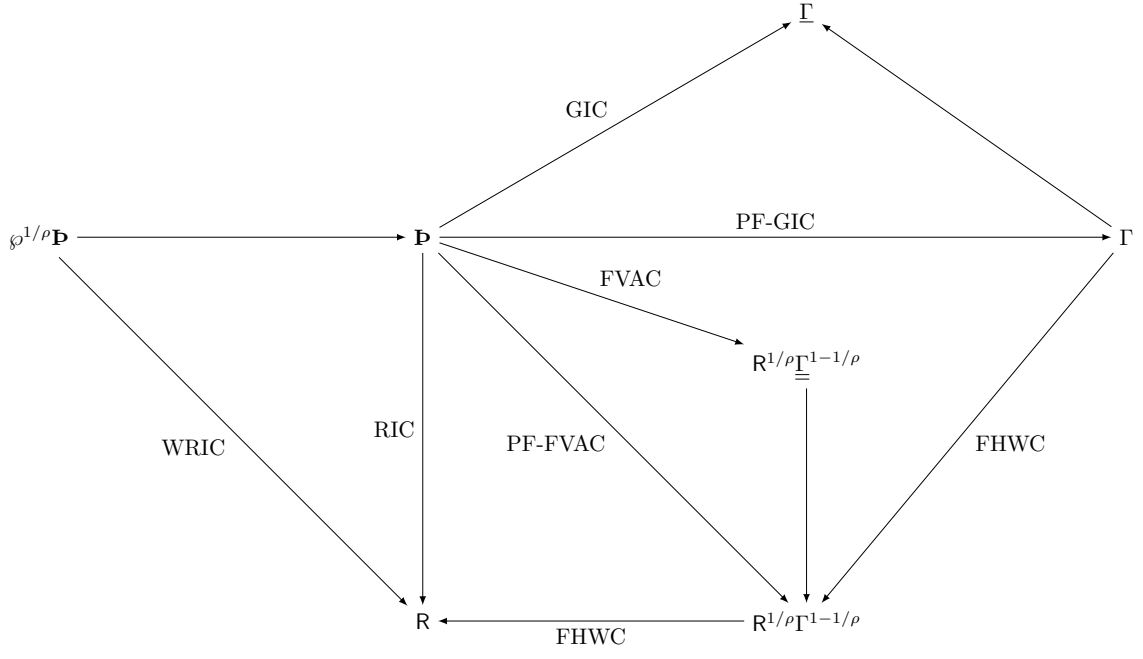

Figure 3 Relation of All Inequality Conditions

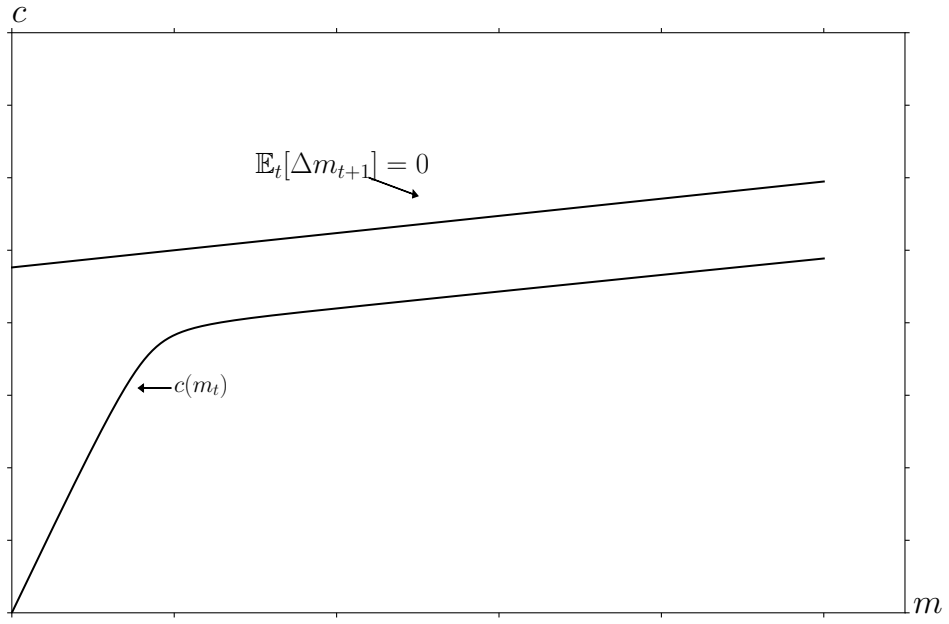

Figure 4 Example Solution when FVAC Holds but GIC Does Not

Figure 5 Target m , Expected Consumption Growth, and Permanent Income Growth

Figure 6 Limiting MPC's

(a) Bounds
