Table 1 Taxonomy of Perfect Foresight Liquidity Constrained Model Outcomes For constrained \grave{c} and unconstrained \bar{c} consumption functions

Main Condition				
Subcondition		Math		Outcome, Comments or Results
PF-GIC		1 <	\mathbf{P}/Γ	Constraint never binds for $m \geq 1$
and RIC	\mathbf{P}/R	< 1		FHWC holds $(R > \Gamma)$; $\dot{c}(m) = \bar{c}(m)$ for $m \ge 1$
and RIC		1 <	\mathbf{P}/R	$\grave{\mathbf{c}}(m)$ is degenerate: $\grave{\mathbf{c}}(m) = 0$
PF-GIC	\mathbf{p}/Γ	< 1		Constraint binds in finite time for any m
and RIC	Þ /R	< 1		FHWC may or may not hold
				$\lim_{m\uparrow\infty} \bar{\mathbf{c}}(m) - \grave{\mathbf{c}}(m) = 0$
				$\lim_{m\uparrow\infty} \hat{\boldsymbol{k}}(m) = \kappa$
and RIC		1 <	Þ /R	EHWC
			•	$\lim_{m\uparrow\infty} \dot{\boldsymbol{k}}(m) = 0$

Conditions are applied from left to right; for example, the second row indicates conclusions in the case where PF-GIC and RIC both hold, while the third row indicates that when the PF-GIC and the RIC both fail, the consumption function is degenerate; the next row indicates that whenever the PF-GIC holds, the constraint will bind in finite time.
